PUBLIC ACCESS DEFIBRILLATOR HOUSING

Help-It Robusta Outdoor Defibrillator Cabinet

PW600

Sudden cardiac arrest gives you minutes, not hours. The Robusta cabinet keeps a defibrillator secure, dry and instantly findable at the place it will be needed, so the nearest bystander can get to it and start treatment before the ambulance arrives.

Designed and manufactured in New Zealand, it is built for local conditions: intense sun, driving rain and coastal spray. A keypad lock and door alarm protect the AED without slowing anyone down in an emergency.

DEFIBRILLATOR — CALL 111 FOR ACCESS CODE TO OPEN

Key features

Built for NZ conditions

Extremely durable outdoor design, tested against New Zealand's varied climate including coastal spray.

Secure access

Waterproof mechanical digital lock with push-button keypad, in rust-proof zinc alloy with an outdoor IP rating.

UV protected

UV stabilised materials give a weather and lightfast rating, so graphics stay legible for years.

Integrated alarm

Magnetically activated door alarm with two sound options and three volume settings alerts people nearby.

Night-time visibility

An optional LED solar-powered light locates the cabinet in the dark, when response time matters most.

Sustainable construction

The cabinet polymer is fully recyclable LDPE, with recyclable automotive-grade graphics.

How to access the AED

1

Call 111

Ask for an ambulance. Give the exact location of the cabinet.

2

Get the access code

The dispatcher confirms the cabinet and provides the keypad code.

3

Enter and turn

Key in the code, turn the knob to open, and take out the AED.

4

Start CPR, then follow prompts

Continue until the ambulance arrives, then close the door to re-secure.

Installation

- Mount between 1.0 m and 1.35 m from the ground for wheelchair-accessible reach.
- Fix to a solid surface. Avoid mounting solely on cladding.
- Use the four supplied 100 mm stainless steel coach screws.
- Keep even tension across all four bolts so the door stays true.
- Write the site details on the location panel once mounted.

Made in New Zealand

The Robusta cabinet is designed and moulded in New Zealand, for New Zealand sites. Local manufacture means the tooling, materials and graphics are specified for our climate, and supply is not dependent on offshore shipping when a site needs a replacement.

Specifications

Overall Height	Overall Width	Overall Depth	Body Thickness	Window Size (WxH)
580 mm	435 mm	314 mm	4 mm PE	240 x 275 mm

Cabinet body: recyclable LDPE, UV stabilised

Door window: 3—4 mm acrylic / UV stabilised PC

Graphics: automotive UV grade, recyclable

Hardware: heavy-duty zinc alloy hinges, 95° opening

Fasteners: high-grade stainless steel

Options: LED solar-powered light
