

PH-M20-WC

ALPHATEC® 2000 Comfort Overall

Designed for workers in hotter working environments.

Features

MICROGARD® 2000 COMFORT has been specifically designed for those working in warmer climates or warm working environments to help reduce the risk of heat stress.

The critical areas to the front of the garment are MICROGARD® 2000 offering a high level of liquid and particle protection with a low level of water vapour resistance. Water vapour resistance

according to
EN 31092 of Ret < 15*

The back panel is MICROGARD® 1500 PLUS fabric which is air and water vapour permeable. This panel allows airflow around the suit, increasing wearer comfort. Air permeability result according to EN ISO 9237 of 160 Vm2.s

Bound seams ensure spray tight protection to the front of the garment and excellent overall particle protection.
