

PH-M23P-Y

ALPHATEC® 2300 Overall

An entry level Type 3 chemical protective overall.

Features

MICROGARD® 2300 fabric is comprised of a polyethylene (PE) barrier coating with a bi-component nonwoven inner layer, the combination of which provides an excellent barrier to many harmful chemicals while being lightweight and yet relatively strong and durable.

- Polycoated bi-component barrier resists permeation of numerous liquid chemicals
- Bright yellow for improved worker safety
- Lightweight yet relatively strong and durable
- Anti-static - Tested according to EN 1149-5

For workers involved in environmental clean-up, general industrial and chemical handling applications.
